Q&A

Q: What do I need to use Castyo?

A: Download the iOS app, free. Use it for free with images on your device. Pay per use to sync from PowerPoint etc.

Q: Does my audience need the app, to follow?

A: No, your viewers only need a web browser on any device, and the unique viewing link that you share.

Q: Can I show presentations on a projector screen?

A: Yes, just make sure the projector is hooked up on the internet, then enter the viewing link.

Q: Is the number of viewers limited?

A: No, you broadcast to anyone who has the viewing link, anywhere on the web.

Q: Can I hold a remote meeting?

A: Yes, when you use Castyo, you can open a speakercall at the same time. Your audience participate in your presentation in realtime over the web.

Security and privacy

- **Presentation:** The viewing link consists of a random number, which cannot be associated to you. Each slide only remains on the server when you show it. The next slide you send, deletes the previous one. A few hours after you send your last slide, the unique web page and link are erased. At any time, you can create a new, random, viewing link.
  Tip: to immediately hide your last slide, just send any image.
- **Sync:** Uploaded slideshows are erased from castyo.com one day after upload.
- **Email addresses** are stored for user convenience. They are never shared with other parties. At any time, you can request by email to info@castyo.com, that your email address be removed.
